Springer International

Bulletin of Volcanology was founded in 1922, as *Bulletin Volcanologique*, and is the official journal of the International Association of Volcanology and Chemistry of the Earth's Interior (IAVCEI). Beginning with Volume 48 (1986), the journal has been published by Springer International and edited by H.-U. Schmincke and S. R. J. Sparks

Copyright
Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in the journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express, or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA: Photocopies may be made for personal or inhouse use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. This fee is US $ 0.20 per page, or a minimum of US $ 1.00 if an article contains fewer than five pages. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Other regulations: Authors publishing in this journal can, under certain conditions, benefit from library and photocopy fees collected by VG WORT. Authors resident in the Federal Republic of Germany or in West Berlin can apply to Verwertungsgesellschaft WORT, Abteilung Wissenschaft, Goethestraße 49, D-8000 München 2, for detailed information.

Contents of volume 48 1986

Bacon CR → Duffield WA et al 97

Beane JE, Turner CA, Hooper PR, Subbarao KV, Walsh JN: Stratigraphy, composition and form of the Deccan Basalts, Western Ghats, India 61

Carey S, Sigurdsson H: The 1982 eruptions of El Chichon volcano, Mexico (2): Observations and numerical modelling of tephra-fall distribution 127

Carey S, Sparks RSJ: Quantitative models of the fallout and dispersal of tephra from volcanic eruption columns 109

Chuan RL → Rose WI et al 181

Crandell DR, Hoblitt RP: Lateral blasts at Mount St. Helens and hazard zonation 27

Delaney PT → Duffield WA et al 97

Devey CW, Lightfoot PC: Volcanological and tectonic control of stratigraphy and structure in the western Deccan traps 195

Duffield WA, Bacon CR, Delaney PT: Deformation of poorly consolidated sediment during shallow emplacement of a basalt sill, Coso Range, California 97

Faraone D, Silvano A, Verdiani G: The monzogabbroic intrusion in the island of Vulcano, Aeolian Archipelago, Italy 299

Fink JH, Zimbelman JR: Rheology of the 1983 Royal Garden basalt flows, Kilauea Volcano, Hawaii 87

Fornari DJ: Submarine lava tubes and channels 291

Freundt A, Schmincke H-U: Emplacement of small-volume pyroclastic flows at Laacher See (East-Eifel, Germany) 39

Freundt A, Tait R: The entrainment of high-viscosity magma into low-viscosity magma in eruption conduits 325

Giggenbach WF → Rose WI et al 181

Glicken H → Ui T 189

Greenland L:Gas analysis from the Pu'u O'o eruption in 1985, Kilauea volcano, Hawaii 341

Hildreth W → Mahood GA 143

Hoblitt RP → Crandell DR 27

Hooper PR → Beane JE et al 61

Johnson KTM, Sinton JM, Price RC: Petrology of seamounts northwest of Samoa and their relation to Samoan volcanism 225

Kokelaar P: Magma-water interactions in subaqueous and emergent basaltic volcanism 275

Koyaguchi T: Life-time of a stratified magma chamber recorded in ultramafic xenoliths from Ichinomegata volcano, northeastern Japan 313

Kyle PR → Rose WI et al 181

Lightfoot PC → Devey CW 195

Lorenz V: On the growth of maars and diatremes and its relevance to the formation of tuff rings 265

Mahood GA, Hildreth W: Geology of the peralkaline volcano at Pantelleria, Strait of Sicily 143

Mullineaux DR: Summary of pre-1980 tephra-fall deposits erupted from Mount St. Helens, Washington State, USA 17

Price RC → Johnson KTM et al 225

Rose WI, Chuan RL, Giggenbach WF, Kyle PR, Symonds RB: Rates of sulfur dioxide and particle emissions from White Island volcano, New Zealand, and an estimate of the total flux of major gaseous species 181

Schmincke H-U → Freundt A 39

Sigurdsson H → Carey S 127

Silvano A → Faraone D et al 299

Sinton JM → Johnson KTM et al 225

Sparks RSJ → Carey S 109

Sparks RSJ → Witham AG 209

Sparks RSJ: The dimensions and dynamics of volcanic eruption columns 3

Subbarao KV → Beane JE et al 61

Symonds RB → Rose WI et al 181

Tait R → Freundt A 325

Turner CA → Beane JE et al 61

Ui T, Glicken H: Internal structural variations in a debris-avalanche deposit from ancestral Mount Shasta, California, USA 189

Verdiani G → Faraone D et al 299

Wadge G: The dykes and structural setting of the volcanic front in the Lesser Antilles island arc 349

Walsh JN → Beane JE et al 61

Witham AG, Sparks RSJ: Pumice 209

Wohletz KH: Explosive magma-water interactions: Thermodynamics, explosion mechanisms, and field studies 245

Zimbelman JR → Fink JH 87

Subject index of volume 48 1986

aa basalt 87
aa-breccia carapace 104
accretionary processes 94
aeromagnetic survey 306
aerosol particles 187
agglutinate 97
agglutinate cones 155
agglutinate sheets 143
air-fall deposit 109
alkalic basalt 146
alkalic lavas 225
alkalic magmas 275
altered by hydrothermal processes 303
ALVIN 291
amoeboid inclusions 157
andesite 17
andesite/dacite 292
andesitic 27
ankaramites 225
axial displacement 115
axisymmetric instabilities 325

backscatter ratios 137
back transport 135
ballistic projectiles 17
ballistic trajectories of large clasts 110
banded pumice 325
basal shear stresses 92
basalt-emplacement 97
basalt-heated water 104
basaltic andesite 292
basaltic cinder cone 167
basaltic lava flows 98
basaltic magmas 291
basaltic sill 97
base surge 285
bed form 245
Benioff zone 351
benmoreites 143
bimodal suites 145
block facies 190
block faulting 206
Bouguer anomalies 267
breccia pipes 97
brecciated carapace 93
brecciated lava flows 189
bulk interaction steam explosivity 275
buoyancy effects 4
buoyant convecting region 109
buoyant plume 129

caldera 143
caldera fill 153
capping cone 163
central channel 89
clast density 112
clast fallout 109
clast size 265
clast support isopleths 111
clast trajectories from plumes in cross-winds 118
clast trajectories in a crosswind 117
clast transport in eruption columns 110
climatic oscillations 127
clusters 138
^{14}C method 155
coarse aggregate tails 133
collapse processes 266
colluvium 157
column density 109
column dynamics of pyroclasts 133
column height 109
column height and mass discharge rate 3
compositionally zoned reservoir 157
conduit system 138
cones 291
connectedness of the vesicles 209
constituent analysis 258
contact-surface steam explosivity 275
continuously decaying vertical velocity component 110
convective eruption columns 109
convective region 3
convective velocities 3
convective velocities within columns 111
cooling-contraction granulation 275
correlation spectrometry 181
COSPEC 185
country rock clasts 265
CO_2 342
CO_2 emission 187
crenulate inclusions 143
cross bedding 151
crosswind 135
cryptodome 167
cupola of steam 275

dacite 17
dacitic volcanoes 27
debris-avalanche deposit 189
Deccan basalts 61
decompression 277
decompression of magmatic gases 123
decoupling of incompatible trace elements 198
deformation of poorly consolidated sediment 97
density of surrounding gas 112
density of basaltic melt 104
density of unlithified sediments 104
depth of sill emplacement 104
devitrification 147
diameters of maars 265
diatremes 104, 265
diffusivity of water 222
disaggregation 158
dispersal area 245
dispersal patterns 109
dispersal velocity 129
distal branching 93
distal fallout 104
distal fallout of ash-sized pyroclasts 110
domal structure 153
domes 291
drag coefficient 112
draining lava ponds 292
drill-holes 299
driving pressure 105
dust layers 39
dykes 349
dynamic metastability of superheated water 245

earthquakes 366
ecological niches 297
effective density of floating pumice 213
effusion rate 87, 292
ejecta beds 265
ejection of wallrocks 265
emergent basaltic volcanism 275
emergent jets 285
emission rates 181
endogenous domes 165
energy dispersive spectral (EDS) analysis 258
epeirogenic uplift 195
eruption clouds 269
eruption columns 3
eruption column width 7
eruption conduits 325
eruption plumes 127
eruption rate 291
excess momentum 129
expansion stage 245
explosion pressures 110
extensional tectonic settings 143
extraterrestrial lava flows 91

fallout and dispersal of tephra 109
fallout, surge, and flow processes 245
FCI (Fuel-Coolant Interaction) 262
$FeCl_3$ 185
feeder dikes 167, 265
film boiling 278
fixed-hotspot model 225
floating banks of pumice 210
flood basalt 195
flow depth 87
flow differentiation processes 291
flow features 291
flow-front heights 91
flow length 292
flow-margin depths 90
flow stratigraphy 61
flow units 39
fluidisation of pyroclastic flows 210, 222
Fogo A trachytic magma 113
foliation 164
formation of tuff rings 265
fountain-fed lava flows 163
fragmentation 277
fuel-coolant interaction 250, 277
fumarolic activity 299
fumarolic emissions 181

gas 181
gas analyses 341
gas exit velocities 110

gas thrust region 3
general model of ejecta fallout in near-vent regions 110
geochronological studies 147
geothermal reservoir 300
giant columns 3
giant plagioclase phenocrysts 61
glass shards 138
global volcanic emission 186
grain shape 245
grain size 245
grain size charactistics 109
grain size distributions 127
grain surface chemistry 245
gravity waves 129
Green Tuff 143
ground layers 39

hawaiites 299
hazard zonation 27
heated pore water 103
heat-induced increase in pore pressure 106
heat loss 87
height of the tropopause 110
helical geometry 325
high-viscosity magma 325
hingeline faults 150
hot spot 61, 195
hyalclastite deposits 168
hyaloclastite 230
hydrostatic pressure 277
hydrostatic pressure barrier 265
hydrostatic pressure limits 296
hydrothermal alteration 97
hydrothermal fluids 291
hydrovolcanism 168
H_2O emission rate 181
H_2S 342
H_2SO_4 185

ignimbrite 147
ignimbrite cooling unit 164
imbrication 165
impact breakage 113
industrial plumes 116
inflation of the chamber 143
in-flight degassing 152
influence of a crosswind on clast fallout 118
initial density 209
initial rate of plume expansion 129
interface instabilities of the Landau and Taylor type 245
intracaldera cone 150
intrusion 128
island arc 249, 350
isopach 115, 127
isopleth 127
isopleth contours 110
isopleths of support 110
isostatic compensation 154
isostatic equilibrium 154

jigsaw cracks 191

K/Ar whole rock age determination 303

lahars 27, 269
lapilli pipes 39
lateral blasts 27
latibasalts 299
lava breakout 93
lava cones 165
lava fountains 104
lava hummocks 190
lava lake 265
lava pond 341
lava temperatures 341
lava tubes 93, 291
levee formation 87
levee heights 90
levee widths 90
linear Newtonian and Bingham models 91
lithic breccias 39
lithic concentration zones 39
littoral cones 168
low-aspect-ratio ignimbrites 165
low-viscosity magma 325

maars 104, 265
magma degassing 341
magma discharge rate 109, 109, 138
magma disruption level 139
magma/groundwater interactions 265
magmatic explosivity 275
magmatic head 105
magmatic inclusions 157
magmatic volatiles 276
magma-water interactions 245, 275
magnetic anomalies 145, 168
mantle peridotite 313
mantle plume 61
MARC I 291
marginal shear zones 88
mass balance 137
mass eruption rates 127, 137
mass-gravity transport 276
mass ratio of water and magma 245
maximum clast size 112
maximum downwind extent 135
maximum grain size contours 109
maximum half width 135
maximum lithic-clast dispersal 127
melilitites 225
mercury porosimetry 209
metaluminous magmas 143
moat cones 156
mobile slurry of clastic material, water, and steam 275
momentum-dominated gas thrust region 111
monzogabbroic intrusion 299
morphology of lava flows 87
mugearite 143, 299

NaCl 185
native sulfur 183
near-vent agglutination 156
nephelinites 225
nested levees 89
nitrogen absorption technique 209
nonlinear, pseudoplastic constitutive law 91

ocean-island tholeiites 225
olivine 313
olivine basalts 299
orientations of dykes 349
orthopyroxene 313

paleovalley 151
pantellerite 143, 146
particle emissions 181
particle size 258
particle support envelopes 109
peperites 101, 168
peralkaline volcano 143
phonolite 39
phreatic 265
phreatic brecciation 97
phreatic eruptions 181
phreatic events 127
phreatic explosions 97
phreatomagmatic 265
phreatomagmatic eruptions 123
phreatomagmatic explosions 131
physical properties of pumice 209
picrite basalt 61
plate tearing 225
plinian deposits 109
plume theory 6
plume transport 127
preeruption surface morphology 291
pressure of water 275
proximal fall deposits 110
pumice cones 143
pumice size 209
pyroclast fallout from eruption columns 127
pyroclastic density flows 27
pyroclastic fall deposits 109, 115
pyroclastics 299
pyroclastic surges and flows 127
pyroclast size 110

radial expansion velocity 110
radial fractures 143
radially expanding column 110
radiometric 299
rapidly ascending magma 275
rare-earth 61
regional stress field 349
residual pore space 213
revesiculation 151
Reynolds Number 326
rheological models of basalt flows 90
rheological properties 39
rheology of basaltic magmas 91
rheomorphic unit 143
rhyodacitic 299
rhyolitic plugs 98
ring fractures 143
ring-fracture volcanism 150
root zone 152
root zones 265

scanning electron microscopy (SEM) 258

scoria 97
scoriaceous bombs 167
scoria cone 265
scrubbing of gas 186
seacoast erosion 158
seafloor 291
seamounts 225
secondary minerals 303
SEM images of particles 183
shallow emplacement of a basalt sill, Coso Range 97
shallow water processes 282
shear- and time-dependent viscosity 91
sheet and pillow lavas 276
shock wave propagation 245
shoshonitic 300
sill propagation 105
SiO_2 185
size distribution of vesicles 209
size distributions of particles 183
small spatter cones 341
small-volume pyroclastic flows 39
solfataric 181
sonar surveys 291
SO_2 186, 342
spatter 276
spontaneous nucleation 245
spreading axes 291
spreading rate 292
$^{87}Sr/^{86}Sr$ 61
stagnation point 116
state, slope angle 291
steam explosions 104
stratified magma chamber 313
stratospheric aerosol layer 129
stratospheric aerosol plume 127
stratospheric wind velocity 110
strongly enriched pumice 39
subaqueous pumice-fall deposit 209, 223
subduction-related marginal basins 277
sublimates 182
submarine volcanos 225
sulfur dioxide 181
sulfuric acid-droplet conversion 139
superheating 250

temperature gradients 299
temperature inversion at the tropopause 110
tephra-dispersal models 134
tephra-fall deposits 17
theoretical isopleths 109
thermal and hydraulic diffusivities 105
thermal detonation 253
thermal diffusivity 92
thermal equilibrium stage 246
thermal erosion 87
thermal flux 4
thermal histories of the xenoliths 313
thermal plume 4
thermal plume theory 110
thermodynamic equation 245
terminal fall velocity of clasts 109
tholeiitic basalt 94, 297
tholeiitic magmas 275
trachyandesitic pumice lapilli 131
trachyte 143, 146
trajectories of clasts 109
transport and sedimentation of pumice 222
transverse surface ridges 89
trapdoor uplift 143
tropospheric and stratospheric transport 127
turbulent-plume theory 134
